HYDROLOCK RAIL - is a galvanised steel wire mesh specifically designed for use with HYDROLOCK STRIP. HYDROLOCK RAIL is used to prevent displacement of the strip during concrete pouring. Supplied at 30 mm width in lengths of 1.0 m.

Application

HYDROLOCK RAIL is applied to the surface of the HYDROLOCK STRIP post placement, and fixed in place using steel pins/nails at a minimum 300 mm spacing.

Storage

HYDROLOCK RAIL is delivered in lengths of 1.0 m in a box containing 30 units. Boxes should be stacked no more than 5 high. Shelf life is unlimited.

Accessory Products

HYDROLOCK RAIL is an accessory product to HYDROLOCK to assist with jointing and sealing. Additional accessories include:

- HYDROLOCK STRIP
- HYDROLOCK GRANULES
- HYDROLOCK PASTE

Material	Galvanised Steel
